

TCC-531

Reactive Water Coated Film

PDS

Description

TCC-531 is a reactive water-based coated film. It's made by reactive silicone resin from the emulsifying reaction. TCC-531 can spread averagely on the surface (the glass parts or other body parts of vehicles) to self-forming a hydrophobic, breathable film.

Characteristics

- Coated film for all body parts on vehicle, including the glass parts
- Improve hydrophobic of metal materials
- Easy to use

Properties

Appearance	Milky white liquid
Active ingredient(%)	40.0%
pH(5%Solution,25°C)	5.0±1.0
Ionic type	Slightly Cationic
Diluent	Water

Safety

This document does not contain the safety information required for the product. Please read the safety data sheet for this product before use.

Storage & packaging

When stored in its originally sealed packaging at 5°C - 40°C, this product may be stored for up to 8 months from its manufacturing date. Comply with the storage instructions marked on the packaging. Once past this expiration date, TAI COUNTY CHEMICAL no longer guarantees that the product meets the sales specifications.

Product comes in 20KG HDPE grey drums(Breathable).
If it freezes, the best action is to thaw it gradually at room temperature. Do not heat it directly.

Applications

- Water repellent agent for car sheet metals and glass parts
- Surface treatment agent for metals
- Water repellent agent for helmet visor
- Water repellent agent for car headlights

Processing

- Application

Dilute TCC-531 to 20~30 times then use.
(Depending on the actual conditions, you can adjust the usage amount.)

***Attention: This product will producing some gas, please storage in cool place.**

Seal the drums after use. Contact with air for a long time, would cause a film on the surface.

The data provided above is to the best of our knowledge and experience and is without any warranty. Users should thoroughly test any application and independently conclude satisfactory performance before use.
