

CB-3

Thickener
PDS

Description

CB-3 is a synthetically high molecular weight thickening agent. With its hydrophilic properties, CB-3 absorbs water to increase the viscosity of solutions. It can use in a wide range of water-based adhesives or latex. The polymer is especially suitable for increasing the viscosity of antifoams and releasing agents.

Characteristics

- Effective within the pH 4-12 range
- Good thickening ability
- Promptly increase the viscosity in a short amount of time
- Only a small amount is needed, making it highly convenient and economical to use

Properties

Appearance	Milky white liquid
Active ingredient(%)	100.0%
Ionic type	Nonionic
Viscosity(0.3% Solution)	0~200

Safety

This document does not contain the safety information required for the product. Please read the safety data sheet for this product before use.

Storage & packaging

When stored in its originally sealed packaging at 5°C - 40°C, this product may be stored for up to 8 months from its manufacturing date. Comply with the storage instructions marked on the packaging. Once past this expiration date, TAI COUNTY CHEMICAL no longer guarantees that the product meets the sales specifications. Product comes in 30 kg and 130 kg drums.

Applications

- CB-3 Utilized in a wide range of water-based adhesives or latex
- Conventional industrial adhesives, e.g. for the building industry
- Adhesives for packaging, woodworking and
- Pressure sensitive adhesives
- High-speed machine adhesives

Processing

For more information regarding processing, please contact Tai County Chemical

The data provided above is to the best of our knowledge and experience and is without any warranty. Users should thoroughly test any application and independently conclude satisfactory performance before use.
